EPA
OK AS IS

Dear Toxic Release Inventory (EPA Form R) Reporter:

Attached is a report, produced by EPA, which lists the chemical identities and corresponding release values for the Form R's EPA received from the facility listed above for Toxic Release Inventory (TRI) Reporting Year 1989 (RY89).

It is EPA's intention to represent all data reported by your facility as accurately as possible. In order to do this, EPA has implemented a variety of quality control procedures. We believe our data entry is of good quality. However, as a final quality control measure, we ask that you verify the critical release value information listed on this report against your Form R files. If you find any data entry errors, please let us know by following these simple instructions:

- o On the attached report, use a red pen to mark through the erroneous value, and write the corrected value next to it.
- o Return the corrected report to:

The EPCRA Reporting Center
P.O. Box 23779
Washington, DC 20026-3779
Attn: TRI 100%

We request that you do this within 21 days of receipt, so that we may correct your data before we make it publicly available in the Spring, 1991. If you do not find any errors in this report, no response is necessary.

Please DO NOT use this report to make changes to release values or any other data which you reported incorrectly. Those changes should be submitted to EPA by making a photocopy of your Form R, writing 'REVISION' in red ink in the space labeled 'For Your Optional Use Only' on page one of the form, marking through the original data and writing in the revised data in red ink. The certification signature block on the revised form must contain an original signature. Mark through the photocopied signature and resign the revised form. Return the revised form to the address above. The attention line on the envelope should read: 'Attn: RY89 Revision'.

Please keep these facts in mind when reviewing the accuracy and completeness of this report:

- 1) The report lists only those Form R's which have passed our internal data quality checks. If one or more forms submitted by your facility is not listed here, you will be receiving additional correspondence from us soon.
- 2) The data represented here may not reflect any voluntary revisions submitted by your facility, if those revisions were not processed by the time we produced this report.
- 3) We have applied certain naming conventions to the way in which your facility's name is represented. For example, we always list the main company name first, followed by the division name. In addition, we use standard abbreviations for certain words such as Corporation (Corp.) and Highway (Hwy.). Please correct this information only if the actual data is incorrect.

If you have any questions about the information on this report, please call the EPCRA Reporting Center:

~~202-488-1501~~

703-816-4445

Let the receptionist know that you are calling about the 'TRI 100% Industry Review'. The receptionist will connect you with a person who can answer your questions.

Thank you for your efforts in helping us to make Toxic Release Inventory data as accurate as possible.
